

MAP

Medical Administration Program

the complete billing solution for your medical practice

MAP

MAP allows your practice to invoice your corporate and commercial clients efficiently, optimising your revenue and streamlining your billing process. The system will assist in annual review process by detailing the employee visits by client and outlining the value against standard charges.

System Outline

- Maintain and update monthly recurring charges which can be invoiced each month automatically.
- Charge corporate employee a set fee with the balance charged to the employer.
- Create Invoices based on employee , spouse and child rates which can vary by employer.
- Specific pricing can be entered for each client if required with the option to include special instruction and extra details.
- Print Invoices, statements and a debtors listing for accounts collection.
- Create manual invoices for one off events with detailed text descriptions.
- Create client reports which detail patient visits.

MAIN FEATURES

- Automatic Invoice Creation
- Employee, Spouse and Child Charges
- Customer Specific Pricing
- Simple Front Desk Operation
- Recurring Charges or Fees
- Special Instructions
- Invoice and Statement Creation
