

MASC

Mobile Automated Sales Control

the complete solution for wholesale distributors

MASC for Sage Line 50

MASC replaces delivery dockets with a handheld computer, eliminating the time and cost associated with paper systems while increasing billing accuracy and customer focus.

Implementing MASC will save significant administration time and improves stock control while providing the data required to run your business efficiently.

The system is user friendly and has a seamless integration into Sage Line 50 using your existing data from

- Customer Records
- Customer Discounts
- Delivery Addresses
- Product Prices
- Special Pricing
- Price Lists
- Product Discount
- Invoice Level Discount

The MASC system can produce consolidated invoices based on your customer preference or you can print your invoices directly from Sage if required.

For more information visit our web site or call for a product demonstration.

MAIN FEATURES

- Automated Invoicing
- Printed Dockets
- Stock Control
- Monthly Accounts
- EDI Compliant
- Barcode Scanning
- Sales Accounting
- Recurring Charges
- Vat Analysis
- Order Processing.

“With the MASC handheld system our sales month end is now complete in hours not days!”

Paul Kenna
Managing Director
Kenna Cards

- Direct Phone
- Remote Dialup
- E-mail
- Internet
- Product up-dates
- FAQs
- Documentation
- Procedures

Other Sage Products From E-Management Systems

Sage Stock Count

We have simplified the stock count process by using a handheld computer that will read a barcode and allow the user to input the count quantity. If your products are not bar-coded you can print barcode labels from the system based on your product code.

The system will value the count at the cost price and the results can be extracted to Excel if required. The stock difference can then be loaded directly into Sage Line 50.

System Highlights

- Barcode Labels Printing
- Multiple Handheld can be used for the count
- Can be used with or without barcodes
- Standard Avery/ Sellotape Labels printed from a laser
- Directly linked to Sage for data upload and download
