

SKIP HIRE

For Skips, Compactors and Commercial Wheelie Bin Management and billing

Skip Hire is a complete management solution for skip hire companies, commercial wheelie bin and SRM Collectors. It enables the user to keep records of customers, skips/containers, site locations while automating delivery note and invoice production.

Skip Hire has an electronic skip diary which allows for capacity handling. Recurring skip or compactor rentals can be added and maintained and billings can be created as required. It includes full sales control, accounts payable and general ledger. The system will also record the EPA and EWC Codes for reporting and delivery tracking

Skip Hire seamlessly integrates the use of a hand-held computer for in-truck docket or invoice printing, cash receipts or job reviews by customer and date. All transactions can be loaded into Skip Hire automatically saving time on docket entry and increasing billing accuracy.

- **Flexible invoicing routine**
- **Recurring charges for rentals or compactors**
